ELSEVIER

Thin Solid Films 318 (1998) 275–279

thin solid films

Subject Index of Volume 318

Adatom dynamics
Computer simulation of adatom dynamics on single-stepped SiC(001) surfaces, 46
Adsorbates
Theoretical study of the electric field manipulation of adsorbates using a Scanning Tunnelling Microscope, 69
AlP
Surface reaction mechanism and morphology control in AlP atomic layer epitaxy, 6
AlGaAs/GaAs
High-precision depth profiling of argon and nitrogen ion etching-induced damage in an AlGaAs/GaAs multiple quantum well structure, 132
Aluminum-based alloy
Annealing effects of anodized Al-based alloy for thin-film transistors, 257
Amorphous metals
The use of ultrasound radiation for the preparation of magnetic fluids, 38
Anisotropy
Studies of the influence of the local growth characteristics on the magnetic properties of electrolytically deposited Ni films, 186
Atomic configurations
Reconstruction of the Si-terminated β-SiC(100) surface, 136
Atomic layer doping
Atomic control of doping during SiGe epitaxy, 1
Atomic layer epitaxy
Surface reaction mechanism and morphology control in AlP atomic layer epitaxy, 6
Attenuated Total Reflexion
Surface waves as a tool for the study of phase transition of nanoparticles, 128
Auger electron spectroscopy
Surface investigations of nanostructured porous silicon, 113
$Au_{1-c}Ni_c$ solid solutions
Structural evolution of Au[001]/Ni MBE thin films and $Au_{1-c}Ni_c$ solid solutions with temperature: a HREM study, 209
Au[001]/Ni MBE thin films
Structural evolution of Au[001]/Ni MBE thin films and $Au_{1-c}Ni_c$ solid solutions with temperature: a HREM study, 209
Au–Ni solid solution
Stress-induced compositional modulations in ultrathin Au–Ni solid solutions grown on Au(001) by molecular beam epitaxy: a temperature X-ray diffraction study, 204

Ballistic electron emission microscopy
Studying interfaces on a nm scale by BEEM, 195
Beveled surface
High-precision depth profiling of argon and nitrogen ion etching-induced damage in an AlGaAs/GaAs multiple quantum well structure, 132

Cavitation phenomenon
The use of ultrasound radiation for the preparation of magnetic fluids, 38
CdS-doped glass films
Structural and optical studies of CdS nanocrystals embedded in silicon dioxide films, 108
CdTe film
Thin films of HgCdTe on silicon surfaces, 33
Chemical vapor deposition
Surface morphology study and electrical properties of $Si_{1-x}C_x$ on Si grown by low pressure chemical vapor deposition, 15
Co/Cu
Structural properties of electrodeposited Co/Cu multilayers, 227
Co films
Influence of Cr capping on the magnetic properties of epitaxial Co on Pd(111), 177
$Co_{1-x}Ru_x$ alloy
Long-range chemical order and induced lattice deformation along the growth direction in epitaxial [0001] $Co_{1-x}Ru_x$ alloys, 215
Contrast mechanism
Studying interfaces on a nm scale by BEEM, 195
$CoSi_2$/Si(111)
Submicrometer patterning of epitaxial $CoSi_2$/Si(111) by local oxidation, 163
Cr capping
Influence of Cr capping on the magnetic properties of epitaxial Co on Pd(111), 177
Cu:Al_2O_3 nanocomposite films
Laser-induced modification of the nonlinear optical response of laser-deposited Cu:Al_2O_3 nanocomposite films, 96
Current–voltage characteristic
Thin films of HgCdTe on silicon surfaces, 33
rf-CVD process
Preparation of thick polycrystalline silicon layers on glass by laser irradiation, 42

Deposition
Optical nonlinear properties of $Cd_{1-x}Zn_xTe$ epilayers grown on (100) GaAs by pulsed laser deposition, 151
Deposition rate
Influence of the deposition rate on the structure of thin metal layers, 223
Destabilization
Destabilization and diffusion of two-dimensional close-packed Pt clusters on Pt(111) during film growth from the vapor phase, 57
2D growth
Enhancement of 2D growth of MBE hetero-structures using laser-assisted MBE techniques, 22
Diffusion
Destabilization and diffusion of two-dimensional close-packed Pt clusters on Pt(111) during film growth from the vapor phase, 57
Dimethylaluminiumhydride
Investigation of thin Al layer growth with in situ infrared spectroscopic ellipsometry, 124

Elsevier Science S.A.

Diode lasers
Semiconductor quantum dots for application in diode lasers, 83
Dry etching
High-precision depth profiling of argon and nitrogen ion etching-induced damage in an AlGaAs/GaAs multiple quantum well structure, 132

Elastic scattering quantum chemistry method
Reconstruction of the Si-terminated β-SiC(100) surface, 136
Electric field manipulation
Theoretical study of the electric field manipulation of adsorbates using a Scanning Tunnelling Microscope, 69
Electrodeposition
Studies of the influence of the local growth characteristics on the magnetic properties of electrolytically deposited Ni films, 186
Structural properties of electrodeposited Co/Cu multilayers, 227
A cross-sectional high-resolution transmission electron microscopy study of electrodeposited Ni–Cu/Cu multilayers, 239
Electroless copper plating
Investigations of photo-induced decomposition of palladium acetate for electroless copper plating, 234
Electromagnetic surface waves
Surface waves as a tool for the study of phase transition of nanoparticles, 128
Embedded-atom method
Simulation of atomic-scale surface migration in homoepitaxial growth using embedded-atom method potentials for gold, 52
Epitaxial
Temperature and thickness dependent epitaxial relationship of Pd (111) on Cr (110), 201
Epitaxial film
Long-range chemical order and induced lattice deformation along the growth direction in epitaxial [0001] $Co_{1-x}Ru_x$ alloys, 215
Epitaxial grains
Formation of epitaxial $HoSi_2$ layer on Si(100), 168
Epitaxy
Low-temperature heteroepitaxy by LEPECVD, 11
Epitaxial growth and patterning of sputtered Fe films on GaAs(001), 219
Etching-induced damage
High-precision depth profiling of argon and nitrogen ion etching-induced damage in an AlGaAs/GaAs multiple quantum well structure, 132
Evaporation–condensation
Raman versus interband absorption in Ge quantum dots, 100
Excimer lamp
Thin tantalum oxide films prepared by 172 nm Excimer lamp irradiation using sol–gel method, 252
Excimer lamps
Investigations of photo-induced decomposition of palladium acetate for electroless copper plating, 234

Fe_xMn_{1-x}/Ir superlattices
Microstructural properties of epitaxially grown Fe_xMn_{1-x}/Ir(100) superlattices studied by HREM, 189
Ferromagnetic resonance
Studies of the influence of the local growth characteristics on the magnetic properties of electrolytically deposited Ni films, 186

GaAs(110)
Influence of the deposition rate on the structure of thin metal layers, 223
Gadolinium
Annealing effects of anodized Al-based alloy for thin-film transistors, 257
Gallium arsenide
Epitaxial growth and patterning of sputtered Fe films on GaAs(001), 219
Giant magnetoresistance
A cross-sectional high-resolution transmission electron microscopy study of electrodeposited Ni–Cu/Cu multilayers, 239
Gold
Epitaxial growth and patterning of sputtered Fe films on GaAs(001), 219

Heteroepitaxial film
Ultra thin 3C-SiC pseudomorphic films on Si (100) prepared by organometallic CVD with methyltrichlorosilane, 18
Heteroepitaxial growth
Monte Carlo simulation of mismatch relaxation and island coalescence during heteroepitaxial growth, 61
HgCdTe film
Thin films of HgCdTe on silicon surfaces, 33
HgCdTe–Si heterostructure
Thin films of HgCdTe on silicon surfaces, 33
High-resolution electron microscopy (HREM)
Structural evolution of Au[001]/Ni MBE thin films and $Au_{1-c}Ni_c$ solid solutions with temperature: a HREM study, 209
High-resolution transmission electron microscopy
A cross-sectional high-resolution transmission electron microscopy study of electrodeposited Ni–Cu/Cu multilayers, 239
Holographic lithography
Epitaxial growth and patterning of sputtered Fe films on GaAs(001), 219
Homoepitaxial growth
Simulation of atomic-scale surface migration in homoepitaxial growth using embedded-atom method potentials for gold, 52
Homoepitaxy
STM study on silicon(001) grown by magnetron sputter epitaxy, 29
Hydrogen
Structures and properties of nano-particles prepared by hydrogen arc plasma method, 76

II–VI semiconductor
Structural and optical studies of CdS nanocrystals embedded in silicon dioxide films, 108
Indium nitride
Growth and nanostructure of InN thin films deposited by reactive magnetron sputtering, 148
Iron
Epitaxial growth and patterning of sputtered Fe films on GaAs(001), 219
Island coalescence
Monte Carlo simulation of mismatch relaxation and island coalescence during heteroepitaxial growth, 61

Laser
Investigation on the relation between the thickness and the orientation of epitaxially grown YBCO thin films by laser ablation, 243
Laser ablation
Epitaxial growth of YBCO on Hastelloy with YSZ buffer layer by laser ablation, 262
Laser-assisted MBE techniques
Enhancement of 2D growth of MBE hetero-structures using laser-assisted MBE techniques, 22
Laser deposition
Thin films of HgCdTe on silicon surfaces, 33
Laser-induced modification
Laser-induced modification of the nonlinear optical response of laser-deposited Cu:Al_2O_3 nanocomposite films, 96
Laser irradiation
Preparation of thick polycrystalline silicon layers on glass by laser irradiation, 42

Lasing
Optical gain of CdS quantum dots embedded in 3D photonic crystals, 93
Lattice
Optical nonlinear properties of $Cd_{1-x}Zn_xTe$ epilayers grown on (100) GaAs by pulsed laser deposition, 151
Lattice deformation
Long-range chemical order and induced lattice deformation along the growth direction in epitaxial [0001] $Co_{1-x}Ru_x$ alloys, 215
LEED pattern
Formation of epitaxial $HoSi_2$ layer on Si(100), 168
Light penetration
Self organized growth and ultrafast electron dynamics of metallic nanoparticles, 73
LOCOS
Submicrometer patterning of epitaxial $CoSi_2$/Si(111) by local oxidation, 163
LP(RT)CVD
Atomic control of doping during SiGe epitaxy, 1

Magnetic anisotropy
Epitaxial growth and patterning of sputtered Fe films on GaAs(001), 219
Magnetic properties
Influence of Cr capping on the magnetic properties of epitaxial Co on Pd(111), 177
Magnetron sputter epitaxy
STM study on silicon(001) grown by magnetron sputter epitaxy, 29
Magnetron sputtering
Epitaxial growth and patterning of sputtered Fe films on GaAs(001), 219
MBE hetero-structures
Enhancement of 2D growth of MBE hetero-structures using laser-assisted MBE techniques, 22
Melting point
Structures and properties of nano-particles prepared by hydrogen arc plasma method, 76
Metallic multilayers
The growth of metallic multilayers on semiconductor substrates and in-situ optical monitoring: the case of Co/Cu on silicon with Pb impurity, 172
Metallic nanoparticles
Self organized growth and ultrafast electron dynamics of metallic nanoparticles, 73
Metallic substrates
Epitaxial growth of YBCO on Hastelloy with YSZ buffer layer by laser ablation, 262
Metallorganic
Investigation of thin Al layer growth with in situ infrared spectroscopic ellipsometry, 124
Methyl desorption
Surface reaction mechanism and morphology control in AlP atomic layer epitaxy, 6
MgO(001)
Microstructural properties of epitaxially grown Fe_xMn_{1-x}/Ir(100) superlattices studied by HREM, 189
Microrelief
Thin films of HgCdTe on silicon surfaces, 33
Microstructural properties
Microstructural properties of epitaxially grown Fe_xMn_{1-x}/Ir(100) superlattices studied by HREM, 189
Microstructure
Nanostructure of ZnO thin films prepared by reactive rf magnetron sputtering, 117
Microstructure of Fe/Cu (Au) artificial superlattice, 180
Mismatch relaxation
Monte Carlo simulation of mismatch relaxation and island coalescence during heteroepitaxial growth, 61
Molecular beam epitaxy
Reflectance anisotropy spectroscopy and the growth of low-dimensional materials, 140
Growth of $Si_{1-y}C_y$/Si- and $Si_{1-x-y}Ge_xC_y$/Si-multiple quantum wells using molecular beam epitaxy, 158
Stress-induced compositional modulations in ultrathin Au–Ni solid solutions grown on Au(001) by molecular beam epitaxy: a temperature X-ray diffraction study, 204
Formation of Al-nanoclusters on Si(111)-surfaces, 231
Morphology
Morphology and optical properties of silicon nanostructures grown on CaF_2, 103
Influence of the deposition rate on the structure of thin metal layers, 223
MQW
High-precision depth profiling of argon and nitrogen ion etching-induced damage in an AlGaAs/GaAs multiple quantum well structure, 132
Multilayers
Structural properties of electrodeposited Co/Cu multilayers, 227
Multiple quantum wells
Growth of $Si_{1-y}C_y$/Si- and $Si_{1-x-y}Ge_xC_y$/Si-multiple quantum wells using molecular beam epitaxy, 158

Nanocrystalline
Silicon based multilayer structures prepared by reactive pulsed laser deposition, 154
Nanocrystals
Raman versus interband absorption in Ge quantum dots, 100
Nano-particles
Structures and properties of nano-particles prepared by hydrogen arc plasma method, 76
Nanoparticles
Surface waves as a tool for the study of phase transition of nanoparticles, 128
Nanoscale magnetic dot arrays
Epitaxial growth and patterning of sputtered Fe films on GaAs(001), 219
Nanostructure
Nanostructure of ZnO thin films prepared by reactive rf magnetron sputtering, 117
Growth and nanostructure of InN thin films deposited by reactive magnetron sputtering, 148
Neodymium
Annealing effects of anodized Al-based alloy for thin-film transistors, 257
Ni–Cu/Cu multilayers
A cross-sectional high-resolution transmission electron microscopy study of electrodeposited Ni–Cu/Cu multilayers, 239

Optical absorption
Structural and optical studies of CdS nanocrystals embedded in silicon dioxide films, 108
Optical gain
Optical gain of CdS quantum dots embedded in 3D photonic crystals, 93
Optical properties
Morphology and optical properties of silicon nanostructures grown on CaF_2, 103
Organometallic CVD
Ultra thin 3C-SiC pseudomorphic films on Si (100) prepared by organometallic CVD with methyltrichlorosilane, 18

Palladium acetate films
Investigations of photo-induced decomposition of palladium acetate for electroless copper plating, 234

Perovskite titanates
Comparative study of [001] surface relaxations of perovskite titanates, 65
Photo-induced decomposition
Investigations of photo-induced decomposition of palladium acetate for electroless copper plating, 234
Photo-induced process
Thin tantalum oxide films prepared by 172 nm Excimer lamp irradiation using sol–gel method, 252
Photointensifier
Atomic scale characterization of semiconductors by in-situ real time spectroscopic ellipsometry, 120
Photoluminescence
Structural and optical studies of CdS nanocrystals embedded in silicon dioxide films, 108
Surface investigations of nanostructured porous silicon, 113
Growth of $Si_{1-y}C_y$/Si- and $Si_{1-x-y}Ge_xC_y$/Si-multiple quantum wells using molecular beam epitaxy, 158
Photonic band gap materials
Optical gain of CdS quantum dots embedded in 3D photonic crystals, 93
Piezoelectric properties
Epitaxial piezoelectric PZT thin films obtained by pulsed laser deposition, 265
PL
High-precision depth profiling of argon and nitrogen ion etching-induced damage in an AlGaAs/GaAs multiple quantum well structure, 132
Plasma-enhancement
Low-temperature heteroepitaxy by LEPECVD, 11
Point defect
Studying interfaces on a nm scale by BEEM, 195
Polycrystalline silicon layers
Preparation of thick polycrystalline silicon layers on glass by laser irradiation, 42
Porous silicon
Surface investigations of nanostructured porous silicon, 113
Power electronic devices
Preparation of superconducting multilayer structure for power electronic devices, 247
Pt clusters
Destabilization and diffusion of two-dimensional close-packed Pt clusters on Pt(111) during film growth from the vapor phase, 57
Pulsed laser deposition
Epitaxial piezoelectric PZT thin films obtained by pulsed laser deposition, 265
Pulsed layer deposition
Silicon based multilayer structures prepared by reactive pulsed laser deposition, 154
PZT thin films
Epitaxial piezoelectric PZT thin films obtained by pulsed laser deposition, 265

Quantum
Raman versus interband absorption in Ge quantum dots, 100
Quantum dot
MBE growth of quantum-size Si-dots on SiC(0001) monitored by RHEED, 88
Quantum dots
Semiconductor quantum dots for application in diode lasers, 83
Structural and optical studies of CdS nanocrystals embedded in silicon dioxide films, 108

Rate equation
Surface reaction mechanism and morphology control in AlP atomic layer epitaxy, 6
Real time spectroscopic ellipsometer
Atomic scale characterization of semiconductors by in-situ real time spectroscopic ellipsometry, 120
Reflectance anisotropy spectroscopy
Reflectance anisotropy spectroscopy and the growth of low-dimensional materials, 140
Reflection high-energy electron diffraction
MBE growth of quantum-size Si-dots on SiC(0001) monitored by RHEED, 88
Formation of Al-nanoclusters on Si(111)-surfaces, 231
Rf-sputtering
Structural and optical studies of CdS nanocrystals embedded in silicon dioxide films, 108

Scanning force microscopy
Formation of Al-nanoclusters on Si(111)-surfaces, 231
Scanning tunnelling microscopy
Studying interfaces on a nm scale by BEEM, 195
Self-organized epitaxy
Semiconductor quantum dots for application in diode lasers, 83
Semiconductor
Reflectance anisotropy spectroscopy and the growth of low-dimensional materials, 140
Semiconductor quantum dots
Optical gain of CdS quantum dots embedded in 3D photonic crystals, 93
Semiconductor substrates
The growth of metallic multilayers on semiconductor substrates and in-situ optical monitoring: the case of Co/Cu on silicon with Pb impurity, 172
SiC(0001)
MBE growth of quantum-size Si-dots on SiC(0001) monitored by RHEED, 88
3C-SiC
Ultra thin 3C-SiC pseudomorphic films on Si (100) prepared by organometallic CVD with methyltrichlorosilane, 18
β-SiC(100) surface
Reconstruction of the Si-terminated β-SiC(100) surface, 136
SiC(001) surfaces
Computer simulation of adatom dynamics on single-stepped SiC(001) surfaces, 46
SiGe epitaxy
Atomic control of doping during SiGe epitaxy, 1
Silicon
STM study on silicon(001) grown by magnetron sputter epitaxy, 29
Silicon based multilayer structures prepared by reactive pulsed laser deposition, 154
The growth of metallic multilayers on semiconductor substrates and in-situ optical monitoring: the case of Co/Cu on silicon with Pb impurity, 172
Silicon-germanium
Low-temperature heteroepitaxy by LEPECVD, 11
Silicon nanostructures
Morphology and optical properties of silicon nanostructures grown on CaF_2, 103
Silicon substrates
Surface morphology study and electrical properties of $Si_{1-x}C_x$ on Si grown by low pressure chemical vapor deposition, 15
Simulations
Computer simulation of adatom dynamics on single-stepped SiC(001) surfaces, 46
Sol–gel method
Thin tantalum oxide films prepared by 172 nm Excimer lamp irradiation using sol–gel method, 252
Spot profile analysis low-energy electron diffraction
Formation of Al-nanoclusters on Si(111)-surfaces, 231
$SrTiO_3$ and $BaTiO_3$ crystals
Comparative study of [001] surface relaxations of perovskite titanates, 65

STM
Theoretical study of the electric field manipulation of adsorbates using a Scanning Tunnelling Microscope, 69
Strained epitaxy
Formation of epitaxial $HoSi_2$ layer on Si(100), 168
Structure
Structural properties of electrodeposited Co/Cu multilayers, 227
Substrate
Growth and nanostructure of InN thin films deposited by reactive magnetron sputtering, 148
Optical nonlinear properties of $Cd_{1-x}Zn_xTe$ epilayers grown on (100) GaAs by pulsed laser deposition, 151
Superconducting multilayer structure
Preparation of superconducting multilayer structure for power electronic devices, 247
Superlattice
Microstructure of Fe/Cu (Au) artificial superlattice, 180
Surface
Surface investigations of nanostructured porous silicon, 113
Surface morphology
Surface morphology study and electrical properties of $Si_{1-x}C_x$ on Si grown by low pressure chemical vapor deposition, 15
Surface relaxations
Comparative study of [001] surface relaxations of perovskite titanates, 65

Temperature
Temperature and thickness dependent epitaxial relationship of Pd (111) on Cr (110), 201
Tetrakisdimethylaminotitanium
Investigation of thin Al layer growth with in situ infrared spectroscopic ellipsometry, 124
Thermal annealing
Stress-induced compositional modulations in ultrathin Au–Ni solid solutions grown on Au(001) by molecular beam epitaxy: a temperature X-ray diffraction study, 204
Thermal oxidation
Submicrometer patterning of epitaxial $CoSi_2/Si(111)$ by local oxidation, 163
Thickness
Temperature and thickness dependent epitaxial relationship of Pd (111) on Cr (110), 201
Thin film
Investigation on the relation between the thickness and the orientation of epitaxially grown YBCO thin films by laser ablation, 243
Thin films
Simulation of atomic-scale surface migration in homoepitaxial growth using embedded-atom method potentials for gold, 52
Thin tantalum oxide films
Thin tantalum oxide films prepared by 172 nm Excimer lamp irradiation using sol–gel method, 252
Transmission electron microscopy
Microstructure of Fe/Cu (Au) artificial superlattice, 180

Ultrafast electron particles
Self organized growth and ultrafast electron dynamics of metallic nanoparticles, 73
Ultrasound radiation
The use of ultrasound radiation for the preparation of magnetic fluids, 38
Ultrathin alloy
Stress-induced compositional modulations in ultrathin Au–Ni solid solutions grown on Au(001) by molecular beam epitaxy: a temperature X-ray diffraction study, 204

Wave length
Investigation on the relation between the thickness and the orientation of epitaxially grown YBCO thin films by laser ablation, 243

YBCO film
Preparation of superconducting multilayer structure for power electronic devices, 247
Yttria-stabilized zirconia (YSZ)
Epitaxial growth of YBCO on Hastelloy with YSZ buffer layer by laser ablation, 262

ZnO film
Nanostructure of ZnO thin films prepared by reactive rf magnetron sputtering, 117
Z-scan technique
Laser-induced modification of the nonlinear optical response of laser-deposited $Cu:Al_2O_3$ nanocomposite films, 96
